

Dear, Future Student

What you need to be successful  
in this class is **PAY ATTENTION**.  
Another thing is do your homeworks.  
There's a reason why she assigns  
it, **IT'S FOR PRACTICE**. Do good  
on the homework then you'll do  
good on the test I promise! Also  
study a little bit everyday it'll  
stick in your mind. Trust me.

Sincerely,

Failing Math Student

Dear Mrs. Mangano's students,

Mrs. Mangano is an amazing teacher. You can easily succeed as long as you do what she asks. Although the homework may seem like a lot of work, but if you do it you can get a lot of easy 100's. Another thing that Mrs. Mangano does is give out homework passes. These are awesome because if you have one you don't have to do your homework or you can give them back for informal 100's. Mrs. Mangano is very approachable, and is happy to answer any of your questions, one last thing is Mrs. Mangano has great resources on her website so take advantage of them. I hope you have a great semester!!

- Alex J

Dear, future students of  
math 2

In order to pass this class,  
you want to study, pay attention  
and do your homework, This  
is an easy class as long  
as you do what your  
suppose to do. If you miss  
a test, do a retest, use  
every chance you have to  
bring your grade up

Dear Future Students,

The most important thing you need to do in this class is ask questions! If you do not understand staring at your notes will NOT help you! Mrs. Mangano does not bite and she will happily help you. Another important thing is to do your homework. Yes it is every night which is annoying but it really makes sure you understand the material so you can understand the next day. Plus she has the easiest homework, it usually takes 15 minutes tops. Also if you get good grades on tests/quizzes you can get homework passes which are so nice! Overall I thought Mrs. Mangano was a great teacher, you are very lucky to have her. Try your best, a little effort goes a long way! Have a great semester!

Sincerely,

Mirza Pearce

Dear future students,  
The best advice I could give you going into this class is to pay attention and do all the homework assigned. At first doing homework was annoying but in the end it is very good practice and helps better prepare you for the test. Also pay attention gets you a good understanding of the topic and this also creates times for you to ask questions if you get confused. Finally I would suggest putting down your phone because time goes by faster when your on it and you can miss a lot of information and can get confusing pretty fast.

— Connor Hemmas

Dear future student,

To succeed in this class, the best thing you can do is actually finish the worksheets. Also, actually paying attention when Mrs. Mangano is explaining things to the class. Once you learn how to do the basics, keep going!

I probably should've finished all my unit worksheets, but I talked to my friends too much. So basically, if you're going to start something, finish it. Mrs. Mangano is an amazing teacher. You'll be fine so don't stress.

Have fun,

Summer Dawson

Ms. Mangano's future students,

When you first come into math 2, it might seem a bit intimidating. When I first came in, I was nervous about being called for the warm up. But, you don't need to be nervous because you can call a friend to help you. Also, make sure you study if you want to master all of the objectives. Another good piece of advice is to always do the homework and save up your passes. The homework will help you. There also may be a time in the future where you need a homework pass but you ran out. You will get a zero. Homework will also help to improve your grade if you didn't do well on test objectives. If you pay attention in class and are not on your phone, you will pass!!  
v

- Reed Fonville ♡

Dear Future Students,

Mrs. Mangano is the goal. The pace might be a little fast at first but as long as you do your homework you will be fine. You will get used to it over the semester. Always ask questions if you don't get something because chances are you will be learning something different the next day.

Good Luck,

Thomas Keretsis

Dear Future Students,

This math class is NOT an easy A. I+ will make you work for a good grade but you also will learn and while you may struggle you will feel good at the end knowing you earned your grade. Not doing your home work is a bit mistake because all these little informal grades can add up but if you do well on tests then you may get a homework pass. You also will want to ask a lot of questions. Don't be embarrassed to ask "stupid" questions. Ms. Mangano will help you! Have a great semester!

Emilie

Styron.

Dear Mr. or Ms. Future Student,

It appears as if you are enrolled in Mrs. Manyano's Math 2 class. Congratulations! I guess you're pretty smart. But remember to not slack off. She might've already mentioned this, but you will have an assignment every day. This means you'll get plenty of study time. Also be organized. A little secret is that you have to label your assignments. Have fun as well. If you aren't a disruptive person and if you're a good worker, then you'll be fine. In other words, don't do what I did.

-Stacey, Previous Mr. or Ms. Future student, 1957

Noori Alzubaid:

Dear future student to pass Math 2 you have to stay organized, Do Your Homework, and study. These are some of the things you should focus on. If I could go back and make better decisions I would do Hw.

Erryn O'Donnell  
1/11/19

## Journal Entry

Dear future students, this class is hard. If you're interested in doing well, keep reading. If you pay attention, do your homework and ask questions, you'll succeed. I struggled in this class because I didn't answer enough questions or truly pay attention. Don't make the mistakes I made because it will result in bad test grades and stress. If I could do this class over again, I'd study, pay attention and try to not copy other people's work. Just try hard and be time proficient.

-Erryn O'Donnell

Dear Students,

Ms. Mangano is a great teacher and resource if you're struggling. In her class it's important to work hard and put in a lot of effort. If you are ever behind go to tutoring because it helps a lot.

I recommend not sitting with your friends because chances are you'll get distracted, overall good luck and do your best.

Best wishes,

Maraki B

1/11/19

Dear future student

Here's a word of advice

STUDY.

This class is hard and you are going to struggle, don't think it's going to be easy IT'S NOT. IT IS HARD. If you want to pass, succeed, or at least get through this class study every thing and review everything because I'm going to tell you from first hand experience all tests aren't the same just do your best and if that's not good enough then study harder.

~~Also~~ Besides if I had done that I probably would've passed this class and I know you're going to disregard this letter so just study and you can't say I didn't say so.

good luck  
you're gonna need it

James

Dear Future Students,

In order to succeed in this class you need to pay attention in class. If you don't get what you're learning then ask Mrs. Mangano instead of sitting there pretending you get what you're learning. You also need to keep your binder organized because she grades that. Also do your homework because she checks to see if you even attempted it.

To: Future Students

From: Past Student

Do your work (NOT IN PEN). Study and focus because some of this stuff is confusing. Don't work too hard, have fun. Be kind and respectful, being rude never got anybody anywhere.

Jordan Segura

1/11/18

Dear Future Student,

Ms. Mangano is a pretty chill, calm, cool teacher. Remember to always do your homework and be smart. **PAY Attention**. Always study do your work.

Dear future students,

Advice that I would give you is to pay attention it's really important that you do because you may miss something that you may ask how to do later. Also if your confused or ask Mrs. Mangano or the people around you. Another advice is to go to tutoring before you take your test to help you get a good grade. Overall this is a great class.

Sincerely, Emily Jeton

Jan 11, 2019

MANGANO FUTURE STUDENTS Inaya Abubakar

Dear future Mangano,

Math II with Mrs. Mangano is not very hard.

You will do well in the class if you:

- Study
- Stay Organized
- Do re-test (if you need to)
- Check Mrs. Mangano's Weebly for

Extra practice

- Ask Questions
- Go to tutoring (if you need to)
- Make friends with your group and people in your class

You will be fine

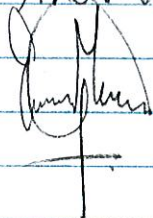

- Inaya Abubakar

Dear future student(s),

listen do not get distracted at all! Once you get distracted just know your grade will drop eventually because everyday you learn something different. Ask as much questions as you can because later on you're going to regret you didn't. You'll enjoy this class so much and groupchats will help out too. :)

P.S. ALWAYS DO YOUR HOMEWORK

Sincerely,

A handwritten signature in black ink, appearing to read "Eric Madrid", written over a vertical line that extends from the signature down to the name below.

Eric Madrid.

Dear Future Students,

The most important thing is retests, take advantage of them. Also make sure you focus instead of socializing because at the end of the semester it's not worth missing information for. Make sure you pay attention and do homework & practice problems.

From, Dona Goodchild

1/9/19

Dear future students,

This class was very enjoyable, and she is a very good teacher. To succeed in this class is very simple, turn in your homework and pay attention. It is very straight forward class and Mrs. Mangano is very good at explaining. Feel free to take advantage of the tutoring and retests.

-Alex Pivona ♡

Dear Future Students,

In order to succeed in this class you should pay attention and do your homework. What I would've done differently is asking questions if I don't understand a concept. Also you should always retake if you don't pass a test. Taking good notes and doing the work makes a huge impact. Good luck!

Dear future students,

If were being honest you can easily  
get a ~~B~~ even if you have no  
clue what is happening. All you have  
to do is you homework and  
try your best. It also really  
helps if you pay attention.

Hello, welcome to the first week of Mrs. Mangano's class. Mrs. Mangano is really nice and chill. Listen to her and ask her questions!! When you do your test, YOU HAVE TO SHOW THE CORRECT WORK! or she will mark it wrong. You can listen to music or she'll put music in for you. Make sure your binder is neat and in order because she grades that also.

Good luck!! April Luong

Dear future student, -

Though I personally am not the best Example I would like to tell you not to stress out about things & to do all your work & turn into on time, dont just sit there at your desk & be on your phone it wont do anything for you & it will just serve to annoy Mr. Mangano who all in all is a great teacher & a great person so be good for her

sincerely,

a sophomore who has no  
elliptic /  
spelling  
skills

PS: if you have a bird mask dont wear it to school it will scare her.

1/10/19

Dear Mrs. Mangano's future students

These are the steps to passing Mrs. Mangano class. Number 1 pay close attention and follow directions. Number 2 keep your notebook updated. Number 3 ask a lot of questions. Number 4 please take the retest when you have the chance. Number 5 be very respectful. Number 6 study for upcoming test. Number 7 do your homework. Last but not least have fun and learn something new.

Sincerely,  
Tyana

Future Students,

I really enjoyed this class and you will too. To really succeed in this class you need to do your homework and always try to get extra help. By extra help I mean ask questions and go to tutoring. Also make sure you watch math videos. If I could go back I would have definitely done more re-tests and took more time on my homework.

-Hailey S.

Dear Mrs. Mangano future kids,

Firstly, be nice to my teacher because she's an amazing teacher, so don't give her a hard time. The most important thing to do in order to succeed is to **pay attention** on your test. It's hard to understand because things move rapidly in this class. Secondly, **do your homework** and make questions ready to go... **homework** will help you review your understanding. **ask questions** whether it's about your grades, the class work, etc. >>

Follow these steps & you will  
succeed! >>

Sincerely,  
Zanmia Taylor
