

How to succeed

hello! Congrats! you have made it to math two!
this class will either be very easy or very hard
depending on you. here are some tips. Good luck!

- always do your homework, it won't take long
I promise
- Pay attention, there is a lot to cover on this
class, so you'll need to
- don't talk, and if you must, stay on the back
and don't disrupt others, you can choose to
fail but don't hurt others
- don't get up every five seconds, you're
annoying people
- try to study so you don't have to cram
like crazy for the final
- don't be scared, just try your best. Ask
for help if you need it!
- be prepared and always have a pencil

I know this sounds crazy and you must
think this is stupid, but this will really help
you. You got this! Go get that A!

- Hadley
Shields

Dear future kids,

To pass Mrs. Mangano's class do all of your work and don't slack off. Do all of the work, homework also counts, so do it. Make sure to study or else you will fail. Don't use your phone and listen. If you don't listen you'll fail the entire unit. If you listen you should pass. She is a good teacher and will teach if you are quiet. If loud she won't teach.

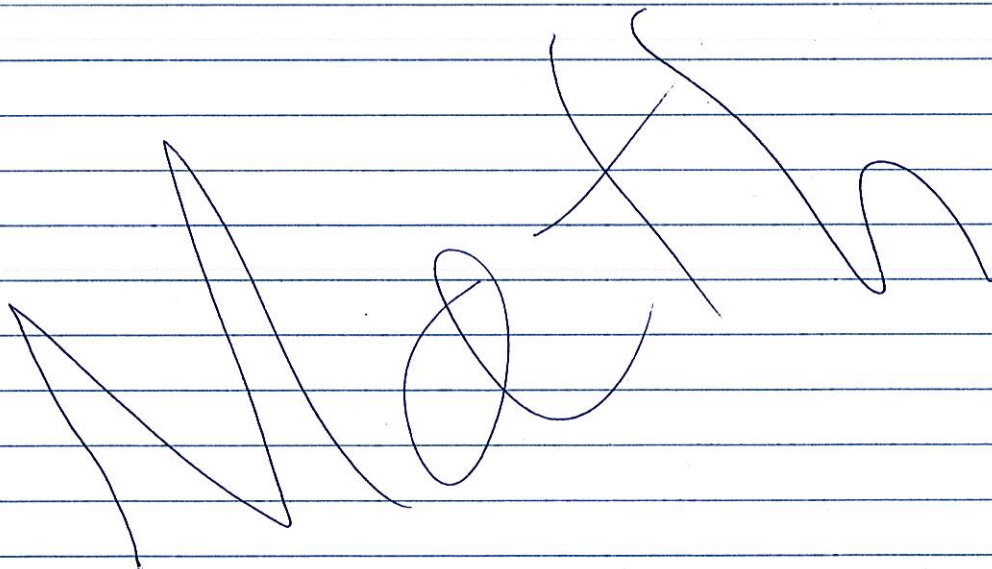

Dear [insert name here],

I first off want to say that you are extremely lucky to get Mrs. Mangano as your math teacher. The second thing is that I would never write down the warm-ups and activities such as homework in the table of contents. **You Need TO KEEP UP WITH YOUR TABLE OF CONTENTS!** and make sure your notebook/Binder is in order because she will grade them. Also do the homework, she will not allow crazy people!

P.S.

She has a website to help with homework and review (it has all the answers)

Connor N.

Dear Mrs. Mangano's new class,

1/11/19

Math two is challenging but does not have to be impossible. Personally I'm not a math person at all and quite frankly hate the concept. The top 3 things that helped me was to do homework, pay attention, and doing the classwork. + knowing you will get the results you want based on the amount of effort you put in. Don't expect to see change unless you do it. Also really, do your homework. Practice does not make perfect but it does make permanent. Pay attention because you can't do anything, nothing regarding math if you don't pay attention. And do your work in class so you actually grasp the concepts being discussed in class. In addition don't stress too much, enjoy life. Do your best and you will will be fine. Good Luck!

Sincerely,
Keddy Hillman

Math pens: via the Internet (they're really bad!)

- Parallel lines have angles in common, too bad they will never meet.
 - Proofs are boring that's a given
 - Why was the math book sad ~ It had too many problems
 - Why are obtuse angles depressed? ~ they are never right.
- * Also if you're from South Charlotte and had Ms. Berger your set! *
- + Ms. Mangano is Really good, take advantage of that, don't fail. because as I said she's a very good teacher and you have no excuse to fail.

Christian
Greason

Dear future students

My advice to you is **ASK FOR HELP**.
You need to look at what Miss M
is showing you. You never know when you
might not understand something she said. Ask
her a question, come to tutoring, and ask
family for help. They can help you a lot more
than you think. She is a better teacher
than you might think she is.

Ben Klutz

Dear future students,

yes, math is difficult, but you can do it. I personally do not enjoy math, & it is likely you don't either. However math is a part of school & you have to give an effort. Mrs. Mangano is a great teacher & I learned a lot. Some advice I would give is to pay attention. Problems are easier when you know what you're doing. Also, go for tutoring & do corrections & retests. If you do bad on a test & retake it, it can really help your grade. Also, you do get homework most nights, but if you pay attention to the lesson, it takes 30 min. max. Don't procrastinate, as it is easy to fall behind. Good luck, & I wish you a great year.

Mauro
Ponce
Block 4

Dear future students,

First you gotta know this is very frustrating the first few days. At least that's what happened with me. You can't ever be scared to ask questions here though. Do not try figure out something you don't understand at home because it does not lead to good things. I tried doing that and I failed the test I tried doing that on. Always ask questions when you are confused. Also if you start failing, don't stop trying to understand the subjects and trying to pass. If you need additional help with the understanding, then you always have tutoring.

Dear Next year classmate;

Please and I can't stress this enough, Don't lose your Portfolios. It's worth 2 quiz grades, if you miss one it's alright but when it's worth 8 quiz grades, that's not it chief. Also don't bitch about the work the more you complain the less time you have to actually work. Finally leave all the distractions somewhere else. It is fun to work with friends, but it's not when all they do is distract you. So concluding just do it.

- Me, Jay by the way

Crispin Flemings

Inorant unmotivated students swear to god if you don't pay attention and do your homework in class you will be taking this class twice. My advice is always pay attention, study (not just read over notes do problems) do your homework, and rest. If you do all of those you will do well in this class. The do nots are; sleep in class, chill on your phone, take a teacher or a student tutor for granted, not keep an organized notebook and not paying attention. Just pay attention and learn how to do the math to the point where you can do any problem in that unit. Also remember practice makes proper.

Dear, Future students

IF you are in this math class you should limit the days you are absent, limit phone usage and do not wait till the day of to start work. This math covers a lot of diverse concepts so be prepared to solve all kinds of math from quadratics to probability problems. Good Luck!

sincerely,

Thomas Higgins

Dear future students,

If you would like to succeed in Mrs. Mangano's class, I would stay off your phone, don't skip, do your classwork and homework, as well as extra study tools she provides. They are very useful. I also would of kept my notebook up to date and in order so you can get a good easy grade on your notebook check. If you pay attention and keep your studies and work in order you will be fine.

Best of Luck!

-Michael Jones

Johannes Richardson-Lor
ALWAYS PAY ATTENTION! THIS CLASS IS NOT
EASY! MAKE SURE YOU DO YOUR HOMEWORK
AND IS PREPARED FOR IT BECAUSE YOU WILL
HAVE IT EVERYDAY! ALWAYS RETEST WHEN YOU
CAN BECAUSE YOU WILL FAIL AN OBJECTIVE!
HAVE FUN BUT DO YOUR WORK! GO TO TUTORING
AT LEAST TWICE A MONTH AND YOU'LL BE
OK!))

Dear future students,

I'm going to tell you all the things not to do in this class by experience :).

- dont use your phone
- dont sleep
- dont talk back
- dont be loud

Things to do

- Do your unit portfolios (200 points) !!!
- Do your HW !!!
- Keep yourself organized with your papers !!!
- RE-TAKE YOUR TEST !!!

Clearly me Franco Ferreira Grezzi didnt do the "Do's" pretty well :/, but if you're smart or actually try you'll do good in her class

- *franco ferreira grezzi*

Franco Ferreira Grezzi

Laleen Salim

Dear future students,

Some words of advice I would give to them to succeed in this class, is to always do your home works. Do not procrastinate... for your studying on test. Always do your home work on time. If you don't understand make sure to ask questions and figure it out before the next day or you will get even more lost.

- from
her student.

Jabari

Don't be on your phone bc you
will miss important info. Do your
homework bc it will drop your
grade. Also keep your binder
in tack

Some things you should do to succeed in this class is to always focus, and when not understanding subjects take as many chances to help you improve. Don't let the certain subjects you do not understand just sit there, until there is no time left. What I would have done differently in this class is taking out the time to get help on the stuff I had to retest. Instead of moving on. You should always take retest, when failing a subject, because not only will it help your grade it helps you.

hey GUYS!

lemme help you, to succeed in this class
i recommend that you do your home-
work, review for ur Quizzes & please please
please relect if you do bad on a test bc it
adds up at the end & hurts drastically.
I know this classroom is small & probably
has a lot of kids in it & it's hard to
concentrate & stay focus, try to use
headphones.

MO <3

Dear future students, Mrs. M is very hard
on students. Don't slack off in class.
Also ask as many questions as possible in class.
She will leave you behind in class if you
are messing around

Carolina León

1/11/19

4(A-B)

Dear future students,

To be successful in Mrs. M's you NEED to pay attention, ask questions if you have them and practice A LOT!

Also do your work in time, don't procrastinate and study hard. Don't cram your assignments and leave them incomplete until the night before the due date. This year, I made the mistake of only studying the night before the test. I also made the mistake of not asking much questions during the lessons. Math 2 is hard but don't be discouraged because you're here for a reason. Be confident in your abilities and work hard to achieve your goals.

Dear "future" students

I honestly advise you to not get distracted, this class is honestly easy pero you have to pay attention. This class goes by fast so dont think you got time to slack, I messed up by thinking that I have time to catch up + I have the worst grade I ever had in math. SO KEEP PHONES AWAY!!!

addy ~~o~~

Dear Future Students,

I suggest studying for at least 30 mins each day. Ask questions always when there is something you don't understand. The homework Mrs. Mangano gives will help you practice what you learn in class. Don't procrastinate, it will build up. Just focus and everything will go well.

- Nicole

Do your homework, and pay attention in class, if you don't pay attention she'll be the worst teacher you ever have because you won't be able to understand what she is doing. IF you are on your phone in this class you will fail just like I almost did.

Abby Bernath

Dear future students,

Pay attention in class and do your homework. If I could take this class again, I wouldn't stress as much about tests and take my time.

Bitar G

Journal Entry 1/11/19

Dear future students, don't slack off or get get distracted. Not paying attention for as little as 5 mins gets you so off track. What I would have done differently is to move away from my friends because they kept distracting. Sitting next to your friends is fun but start socializing when you finish with all your work.

Letter to Future students

Ryan Zusi

Dear future students,
There is a lot of advice I could give you but here's a little summary. Always do your homework. It actually counts for a lot of your grade. Study a lot because if you don't. Good luck you might not survive. Always retest no matter what because it will help a lot. Don't talk out of turn cause you will get in trouble. Always ask questions because it will help. Lastly, always update your portfolio because it's an easy good grade if you do your hw and classwork and helps a ton with final review. Good luck.

Aniana Salas

My suggestion for this class would be don't procrastinate. If you don't know something ask, never go on to the next thing without understanding what you learned. If you don't understand a topic it **WILL** follow you. I would have done **ALL** my retests. I also would have done my homework, trust me it's not that much work. Keep up with your portfolio. Pay attention to class, don't be on your phone.

My first tip,

something that you should always do is your homework. If you do your homework your grade will not be too bad. Sometimes the test and quizzes are hard and stressful but try your best. Also, do not talk in class.

Do not be on your phone because when the day is over you will not know anything because you

think that the teacher is very important and will most likely be on

your Midterm and Final. In my class people talked all the time and then

we would end up not learning what we had to learn that day so next

day in class we learned so much stuff we could barely remember anything

So just pay attention, do your homework, and stay off of your phone!

Luzeylen Liva Toscano

DO NOT use your phone!!! Number.
One rule I say this because I
been through this and start
to fail this class take
chances at future that will
help you with things I didn't do
that. mistakes is okay, do
Retakes take opportunity
DO let your friends distract
you ms. mamano is a nice
teacher don't get her mad

Good luck
MAYN 2

Dear Mrs. Margaros future students
Please do your homework. I did
so bad in this class because I didn't do
my homework. She was pregnant so it made
the experience way better. Tests for me were
so hard, they're not multiple choice and
it requires a lot of work. Do all your
work, answer every single question on your
work, because she does take off points
for 1 question being done. Don't use your
phone during class, or if you are don't
get caught. Try to get those homework
pass, they are a blessing. Please actually
try and do your work. Pass this
class.

Sincerely,

Israel Serna
