

Dear future students,

So I slacked off a lot this year. I'm telling you right now slacking off is NOT a great idea. It brings you so much stress. Because then you have to ask for extra credit, retest tests and rush to the last minute to finish. I've experienced it this semester and it is not fun nor is it okay and I realized that's not the way to succeed. I recently started doing my homework and studying a lot and immediately saw a difference. Yeah, you might think 'studying is a waste of time' and that's not worth it but I promise if you pay attention, do your homework, ask questions when you don't understand and study IT WILL PAY OFF.

-Lidia Dominguez

Dear Mrs. Mangano students,

I encourage you to bring a pencil and a piece of paper everyday. Do not and I repeat DO NOT use pen at all in this class. You should study every single day and always ^{try to} finish your homework even if your struggling just try. ALWAYS GIVE QUESTIONS when something is not understood.

Sincerely,

Wauykerd!!

Journal Entry

Khira Layla

Dear Mrs Mangano Future students,

In this class you will need to stay focused and always do your work, homework, & retest. Never give up because I did at one point when the work was getting to hard I wish I would have kept my motivation, work hard and you will have a good grade!

Christen Armstrong 5/26/17

Dear Future students,

To pass in Mrs. Mangano's class you must show your work. You'll miss 95% of the questions you don't show your work on. If you don't understand something ask questions or guidance on the steps to get the answer.

Dear Mrs. Mangano's students,
In order to succeed in class make
sure to always come prepared
with your pencil and paper and
binder. Keep your portfolio updated
always and do your homework.
If you do your homework and
classwork you will have a passing
grade. Something is better than
a zero.

Sajid

Dear Mrs. Mangano's future students,
Some of you might think math 2 is kinda like
Math 1 it is kind of but you learn more new
things than math 1 of course it might seem
pretty difficult but trust me once you follow
the rule and pay attention to what Mrs. Mangano
shows you once you pay attention and you know
how to do it it will super easy. One thing you
might not like is Mrs. Mangano's daily homework
please guys don't forget to do the homework
because if you don't it goes down by a lot but
when you do it doesn't really go up by that
much but it's better than not getting your grades
down. But honestly Mrs. Mangano isn't that
bad for the HW. She is super cool.

Journal Entry

Focus on your on self
and don't talk to nobody and
listen to the teacher when
she is teaching. I would of done
more successfully in my other
tests if I just didn't talk with
other people. If you want to
have an A on math focus on
your task do work, classwork and
homework

Dear Mrs. Mangano's future students,

Good luck with this class. I'm not good at math so I have a bad grade in this class. But if you do things like the homework and stuff then you will definitely pass. If you wanna get like an A or a B, then do good on your test and test corrections. Well, just do better than I did. Mrs. Mangano's a pretty good teacher, so have fun kidz and don't do drugs. C

Sincerely

Anonimously written by me.

DYLAN

Dear Mrs. Mangano Student. I'm going to be your tutor today, and give you some advice in how you can be successful in this class:

- ① You have to be respectful with your teacher.
- ② Make sure that you always present your HW.
- ③ Do not miss any class, because it can be bad for your self. Also it won't let you understand the topic.

Dear Future Students,

Being great in this class take hard work. But Its easy if you do your work and stay focused. When she gives you homework show your work and do it in pencil. This class can be fun but it takes work and lots. Her fun and love T/Re.

5/26/17

Dear Future Students,

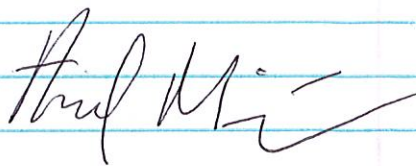

In Mrs. Mangano's class, I recommend studying a lot and doing all your work. Getting the answers from someone is not going to get you anywhere in this class. You need to do your work and try your best in order to succeed.

Studying for your tests is something you definitely need to do to pass this class. Good luck!

To whomever it may concern,

Doing well in this class is either really really easy, or really really hard. As long as you turn all your work in, you'll be fine. Don't be afraid to ask questions and pay attention in class. Also be really careful with who you work with. Some people only want to work with their friends (if you're lucky, your friend might be productive, but that's rare). In short, don't die.

Sincerely,

('clap')

Savannah Burroughs

Hi. If you don't pay attention, you will fail! Do your homework because it's a grade and it can bring your grade down. Don't frivolously use homework passes. ASK QUESTIONS. If you don't understand tell Mrs. Mangano. You should annoy her with questions. Do retakes and test corrections, that's it.

Dear future students,

You need to study very hard because you can't get by in this class if you don't. You won't get by. Don't print homework passes also because she will catch you. Also don't touch her thermostat, because she will become very angry. Also go to tutoring when she has it because it will help.

Dear future students,

This class is not that hard. If you study for tests, pay attention in class, and do your HW you should do fine. Something that helped me when I missed a week because of sickness was going to tutoring after school. Do not touch my thermostat or you will be automatically removed with a lunch detention. Try not to be on your phone or fall asleep during class. Good luck.

Dear future students,

Good luck. The tests are going to be scary, but it'll be ok. Just letting you know, retests don't really help your grade, so study hard the first time.

♡, Lauren Gleason

Annie Turk

Dear Future Students,

Some things you need to succeed in Mrs. Manganò's class are:

- actually study before tests
- focus during class because it goes fast
- try doing your homework and don't just "wing it"
- use homework passes sparingly
- really understand the concept of what is taught

Dear future students,
Good luck. Math is a complex way of telling
your brain you need to know problem solving
strategies. In this class, pay attention to
everything Mrs. Mangano says. It might
be on the test. If you're having trouble +
ask questions. Ask for help, don't be afraid.
Go to tutoring. Don't forget your homework +
most of all keep up with your portfolio.
It's important.

Journal Entry

Dear Future Students,

Show up to class early because if you come on time that's not early enough. Make sure you write down everything because if you don't write down 1 thing, you will be lost. Study for test so you don't have to re-test.

If I could do it over, I would study more and ask for help. Someone probably has the same question. I would also wear layers because it might be freezing or it might be hot. You never know.

Isabella

Friday May 26th

Dear Future Students,

Come to class on time, study everyday, and complete your homework. I recommend taking your time in understanding the topic. If you don't understand, ask the teacher for an explanation. Tutoring is after school, it is a good place to study, do homework and ask questions. Stay off your phone.

Journal Entry 5/26/17 Jenn Walsh

Dear students,

To survive this class, make sure you bring paper and pencils, most people won't have either, so you won't be able to borrow from someone if you don't have it. Pay attention when Mrs. Mangano is teaching something new, it's really annoying when people ask questions that were just answered. If you are confused about what you learned, ask other classmates, then Mrs. Mangano, and then go to tutoring. This class is pretty easy if you pay attention. Good luck!

~Jenn

Dear future student,
in order to succeed in this class
you have to pay attention, and
don't zone out. Also just pass
the test the first time, I had
to retest almost every single test.
And once I did retest I was
mad at myself for not passing
the first time, so STUDY ALOT and
go to tutoring, ask questions if
you're confused.

sincerely, Past student.

Dear Mrs. Mangano's future math 2 students,

Do your work. Homework, CLASSWORK, portfolio checks. It brings your grade up even if you fail a test. Also for tests, please study. Study Study Study. It helps. Don't cheat, don't lie about your homework. Just learn math. And pay attention

-Caroline Stallings

Dear Future students

What you'll need to do to pass this class will be to follow ms. mangano directions, and always do the homework. One thing I thing I could of done better was actually do the homework.

Ps. do good on the tests.

Sincerely; Jonathan F

Dear future students

Hi, don't be like me, on the verge of an 80, struggling to pull my grades up. To avoid this in Mrs. Nic's class, you should pay full attention, and take detailed notes! That's very important! Also study a lot! If you fail a test, you can retake it, but it's the worst feeling to realize what you did wrong, and then only be able to get up to a 79! If I could do it differently, I would study more.

¡Adios!

Brad Hood

Dear future students,

This class can get very confusing if you don't put in any effort. It starts out easy but gradually gets harder. It is important to study and do your work. Do the portfolio because it's a VERY easy grade. Good luck. You'll need it.

- Madison ♡

Dear new student,

It is important to study for all your math tests because I didn't once and I got a 50 on my test.

Also you have to pay attention the whole class because you might miss something important.

-Mariyssa

Dear Future Students,

Be ready to do a lot of work in this class. You will be treated with homework everyday, and if you don't learn the material, you will not do well. The most important thing to know about this class is that it requires patience. Some problems and functions are necessarily hard, but more tedious and require a lot of steps. Remember to do your homework as it will impact your grade a lot since you will only do tests and projects once a unit, so this work will make up most of it. Other than that just remember to study and good luck.

Emily George

If I could tell future students anything, I will tell them to NOT procrastinate. Just do your work as soon as you get it. Also, you need to ACTUALLY study. It really does help.

To succeed in this class it's fairly simple
all you really have to do is your work.
Don't Procrastinate!!! Do your homework and
given assignments, if you do that this class
will fly by easily.

Evelyn Reyes

Dear future students,

Please pay attention in class. Also do your work in class and don't be afraid to ask questions. Don't let your grades suffer because you were too scared to ask. Do your homework, it's an easy informal grade. Stay for tutoring, it makes a difference. I didn't and that's probably one of the reasons why I didn't get the grade I wanted. Be smart and study.

Dear, Mrs. Mangano's ^{L. Emma Taylor} future students,
to succeed in this class
It is important for you
to study every night and
pay attention in class so
you don't get confused
and that you don't get
behind the rest of the class.
Make sure you do your homework
because those informal
grades can come in handy,
and do everything in pencil
you will get points taken
off if you don't. Put your
dates on your portfolio
and number every page.

Friday, May 26, 2017

To succeed in Honors Math II, you have to always do your homework and turn in your portfolio. Please study for your tests and you will have a good grade in this class!

-Darcy Ramos

2nd blocks

5/26/17

Ashley Lamb

Dear Future Student,

My name is Ashley Lamb and I guess you could say my math experience was, well not what I thought it would be. First off if you have this class second semester, like I did you might just be in for a rude awakening, this was because I took math 1, first semester of 8th grade year and I forgot everything we learned. I think the best advice for being successful in this class is to not wait until last minute to get your grade up, especially if you have to do a few retests. Next, study for your tests because if not you might end up like me having a B5 as a quarter grade. Just know, try your best the whole semester because trying to pull up a D average to a B is very difficult. Anyways,

Good luck.

Journal Entry 5/26/17

Sydney W.

Dear student,

In this class, you will learn a lot. For me, unit 1 was the hardest. It was the first time I had done math in a long time and it was the longest unit. Paying attention and staying for tutoring is the best way to completely understand the work. Ask questions and don't be stupid, do yo homework, homie.

-Syd

5/26/17

DEAR MRS MANGANO'S FUTURE STUDENTS,

Hello! My name is Peyton and I was a student of Mrs Mangano's in 2012. So, here's the deal, her class is really not hard at all. Walking into it, I thought it would be, but it's actually pretty easy. The easiest way to get a good grade in her class is to do your work and study for tests. It's as simple as that. I know you're probably thinking "how do I study for math?" "what am I supposed to do to study?", just look over your notes and practice problems, it really helps. Also, ask questions if you're confused. I can't tell you the number of times I stayed an extra 2-3 minutes in her class just to get clarification. It does not hurt to ask her. Those 3 tips that I just gave you will thunkilly get you A's and get you an A or B. Don't stress about math 2 guys, you got this. If you really try and work hard, it will go by like a breeze. Good luck!

sincerely,
PEYTON PORTALS

Dear student,

KEEP UP
w/ your

PORTFOLIO

at the beginning
ps - don't forget about cover page!

Math!

can be stressful but just study you
will be fine!

Don't cry about it you, you got this
I believe in you.

Cheyne Taylor

Dear Mrs Mangano's Future students,
I advise you to pay attention and complete your homework and classwork. Doing this will help you on test because you should prepare yourself the best way you can and I suggest you do practice problems. Do not do any of your homework, classwork, or test in pen because you will get points off the assignment. When you do your homework, you have to have work and it will be counted as incomplete and doing your homework can get your grade even though it's an informal grade. Ask questions if you need help, don't hesitate and good luck.
